

# Catfish 700 HD

Outboard Work Boat

# Catfish 700 HD

## General

L.O.A: 7.31 Metres  
Beam: 2.59 Metres  
Draft: 0.35 Metres  
Construction: Aluminium  
Max HP: 150hp  
Service Speed: 25 Knots  
Load Capacity: 1000kg

## Specification

All aluminium construction to above specification to include:  
Alloy helm console, for standing helm position, with heavy duty cable steering.  
3x Alloy Heavy Duty bollards, one mounted onto foredeck, two in aft quarters, all through welded for maximum strength & capable of lifting from.  
2x midship cleats, for spring mooring lines.  
Built-in Polyfoam buoyancy.  
Trailer winching eye.  
Heavy duty ABC AA extrusion section used for keel construction, providing adequate protection for beaching on hard concrete surfaces.

## General Description

7.0 metre Outboard driven aluminium work boat, combining safety, stability and comfort with ease and efficiency of operation.

The hull is designed in such a way to reduce spray and wave making yet still provide excellent performance with comfort of ride, the forward hull sections afford a great amount of lift to ensure smooth water flow around the hull. Aft the angle of dead rise is reduced, thus providing excellent load carrying capability, stability, shallow draft and guarantees clean water flow to the propeller.

Welded aluminium construction throughout for minimal maintenance, maximum working life and continual operation. Marine grade 5083 (N8) aluminium is used on all plating in the construction. The hull plating is heavy duty being 6mm thick as is the internal transverse, longitudinal and bulkhead frames. Heavy duty HE30 extrusions are used for stringers, chines, support angles and channels. 4.0mm thick alloy smoothplate plate is used on all Cockpit sole walking surfaces.

Reinforced gunwale sections constructed from 5083 grade 5mm thick alloy plate. Raised foredeck, with Heavy duty bollard. Full width outboard transom with design option to accommodate single or twin outboard engines. Storage within transom area to accommodate standard 25L Outboard fuel tanks and marine battery if required. High Gunwales designed to offer safe enclosed protection to passengers, crew and cargo.
